China-West Yak Industry (Group) Company

With the registered capital of 130,000,000 RMB and total assets of 1.2 billion, West Yak Group is a private group approved by the National Business Administration. Currently it possesses net assets of about 900,000,000 RMB and 15 enterprises engaged in stockbreeding, tourism, Pharmaceuticals, trade, chain restaurants, biochemical and environmental protection industries.

As about 95% of the yaks specially distributed on the Qinghai-Tibetan Plateau (Sichuan, Gansu, Qinghai and Tibet), they are pollution-free. West Yak Group has 1050,000 mu grassland and stockbreeding base of 12 counties of Sichuan, Gansu, Qinghai and Tibet. The biggest powder milk plant was built there. Hence, the yak resources become one important foundation for the development of the Group.

In 2002, the Group signed agreements with "Land O' Lakes", one of the American biggest agricultural cooperatives, and with EMF, a well-known German food equipment manufacture in the world, to build the largest yak dairy and meat plants on the Plateau with the latest technologies and international standards.

The Group plans to invest 1.5 billion in the following 5 years on the comprehensive and deep exploration of the yak resources, which will exert tremendous economic and social influences on the Tibetan areas. Farming, stockbreeding, tourism, pharmaceuticals and processing industry will be pushed forward, the income of the farmers will be increased, more modern talents will be educated and employed, eventually the living and working style of the Plateau will be changed and social development will be achieved.

President: Dong Zhou

Cooperation with Land O' Lakes, USA

The company will follow the value of "Yak Economy, Yak Culture, Yak Zoology" to develop the yak industrialization and develop the minority’s and local economy. It aspires to make the people rich, make the government rich and make the state peaceful!
